

## How Much does a Fish Weigh?

Length  
Times  
Girth Squared  
Diveded By  
800 Equals the  
Fish's Weight!

Length  
20" inches

$20" \times 100" = 2,000$   
 $2,000 / 800 = 2.5 \text{ lbs.}$   
The Fish's Weight is 2.5 lbs.
